Description

This nail machine (model 45455-5) has a capacity of 100 nails and is suitable for nails with a length between 10 and 50 mm. The nail machine is extremely suitable for use with parquet, small boxes, window slats, door frames and all kinds of work without pulling or pushing resistance. The nail machine is equipped with an adjustable button for air relief during use and has a rubber handle for a firm grip. In addition, the rubber handle ensures that the compressed air moves in the cold. The nailing machine is equipped with a nose guard (to prevent nails from coming loose unexpectedly). The nail machine has a steel holder for grommet (prevents damage to wire in aluminum of the nail machine), is equipped with a safety rubber to prevent scratches on the material and the charger shows how many nails are still available. The nailer is in a sturdy case with accessories and clear instructions. The nail machine weighs 1.29 kg and works at a maximum pressure of 6 bar.
