| EAN                    | 8712418346190            |
| Weight (kg)            | 11.000000                |
| Motor power (hp / kW)  | 2.0 HP / 1.5 kW          |
| Cylinders              | 2                        |
| Stages                 | 1                        |
| Maximum pressure (bar) | 10                       |
| Pump speed (rpm)       | 990                      |
| Oilfree                | No                       |
| Oil capacity (l)       | 0.50                     |
| Intercooler            | No                       |
| After cooler           | No                       |
| Compatible with        | APZ 220+ 400 V (34149-S) |

# Description

K11 piston compressor pump

The K11 piston compressor pump is a single-stage belt-driven device equipped with two pistons that ensure high reliability and efficiency. Produced in the European Union, it meets European quality and safety standards.

The K11 model is characterized by a compact design and low rotational speed, which ensures quieter and more stable operation. Cast iron cylinders, wide ribs and forged crankshafts guarantee durability and long life. This pump is perfect for smaller applications where precision and reliability are required.

Technical specifications:

Engine power: 2 HP (1.5 kW)

Performance: 217 l/min

Maximum pressure: 10 bar

Rotation speed: 990 rpm

Number of pistons: 2

Number of compression stages: 1

Dimensions: 350 x 280 x 250 mm

Weight: 11 kg

The K11 pump is delivered without oil. Before starting, top up with VG 100 specification oil to ensure optimal operation and safe use.
