Description

K100 piston compressor pump

The K100 piston compressor pump is a top-of-the-range, two-stage, four-piston, belt-driven unit providing unrivaled performance and durability. Produced in the European Union, it meets rigorous quality and safety standards, which makes it an excellent choice for the most demanding industrial applications. The K100 model uses an advanced two-stage compression system that ensures efficiency and stability of operation. Cast iron cylinders, forged crankshafts and wide ribs guarantee durability and resistance to overload. Large pulleys with enlarged blades effectively support cooling, enabling intensive use without loss of performance.
