## Description

This stapler (model 45427-5) has a capacity of 100 staples and is suitable for staples with a length between 8 and 25 mm. This stapler is extremely suitable for use with insulation, decoration, seat coverings, plastic gutters, etc. The stapler has a depth setting, so that the staples do not slip through when used for thin or soft materials. The stapler is provided with an adjustable knob for air relief during use and has a rubber handle for a firm grip. In addition, the rubber handle ensures that the compressed air moves in the cold. The stapler is equipped with a nose guard (to prevent unexpected staples from coming loose). The stapler has a steel holder for grommet (prevents damage to wire in aluminum of the stapler), is equipped with a safety rubber to prevent scratches on the material and the charger shows how many staples are still available. The stapler comes in a sturdy case with accessories and clear instructions. The stapler weighs 1,055 kg and works at a maximum pressure of 6 bar.
